

Improve your deal processing to improve your results.

Close the deal and get funded quicker

How can you ensure that the deals you close today will get funded quickly?

- Is all of your documentation always complete? Are you certain?
- How does your dealership ensure that everyone in the process is held accountable?
- What is your process for ensuring that nothing remains outstanding?

More Control...Less Cost

What if there was an easy to use system that could automate the way deal packets are controlled, audited, and distributed for funding? What if this "virtual auditor" system never slept and was relentless in follow up to make sure that any deal packet with missing documents always got completed on time every time?

- We don't replace your F & I solution. We make it more efficient.
- We don't add time and complexity to deal processing, we automate it and make it faster.
- We give you more auditing without more costs.

docMgt identifies all of the documents in a deal packet and immediately notifies the right users when anything is missing to complete the transaction.

docMgt is easy to deploy and improves cashflow!

- Identify all documents in a deal packet and verify all of the requirements by deal type.
- Notification to the right users if anything is missing.
- If deficiencies are not fixed on time reminders are sent.
- Real time visibility of deal statuses.
- Once requirements are met funding requests sent.

When you automate the document auditing process deals get funded quicker, you are better prepared for the month end rush, and cash flow is improved!
